

StorageReady

YOUR STRATEGIC STORAGE CONTROL PLATFORM

THE STORAGE MANAGEMENT CRISIS

Enterprise IT teams face a growing challenge: managing complex storage environments across multiple vendors while ensuring 24/7 uptime. Teams switch between consoles daily, overwhelmed by fragmented alerts while critical issues go unresolved.

The Business Impact

- Missed critical alerts due to overwhelming vendor-specific notifications.
- Inefficient resource allocation as teams chase issues across isolated systems.
- Unplanned outages from capacity overruns or misconfigurations.
- Compliance risks from lacking a centralized audit trail.

“Storage outages can result in significant financial losses, often reaching hundreds of thousands of dollars per hour due to downtime, disrupted operations, and delayed recovery efforts.”

ReadyWorks Storage Observability: The Strategic Response

StorageReady delivers unified visibility and proactive control across all major storage platforms. The platform consolidates monitoring, filters alerts to highlight what matters, and automates responses before disruptions occur.

Core Value Proposition

- Centralized observability across all major storage vendors.
- Intelligent alert filtering that highlights only critical events.
- Automated response workflows integrated with ITSM and CMDB tools.

Platform Capabilities

- **UNIFIED STORAGE MANAGEMENT:**
 - View your entire storage environment in one dashboard. Eliminate siloed vendor portals and standardize alert formats and severity levels across platforms.
- **INTELLIGENT MONITORING & ANALYTICS:**
 - AI-powered analysis identifies trends and early warning signs. Reduce alert fatigue and forecast capacity needs with confidence.
- **PROACTIVE OPERATIONS:**
 - Set custom thresholds to catch issues before they escalate. Automatically create and route tickets through ServiceNow or your ITSM system of choice.
- **ENTERPRISE INTEGRATION:**
 - Integrate seamlessly with NetApp, Dell EMC, Pure Storage, Cohesity, and more using secure APIs. No agents required and no disruption to existing architecture.
 - 50 percent reduction in mean time to resolution.
 - 90 percent reduction in alert noise.
 - Fewer outages through proactive issue detection.
 - Compliance readiness with audit-friendly tracking.
 - More team time focused on strategic priorities.

“We transformed from reactive firefighting to proactive strategic management within weeks of implementation.”

-IT Infrastructure Director, Fortune 500 Enterprise

Implementation & ROI

The following features are not included in the promotional offering and require a full license:

- **FAST, LOW-RISK DEPLOYMENT:**
 - ReadyWorks connects to your systems via secure APIs without requiring agents or architecture changes. Most customers are up and running within days.
- **PROVEN PROFESSIONAL SERVICES:**
 - Our team guides your implementation with configuration workshops, knowledge transfer, and change management support. Ongoing advisory services are available as your environment evolves.
- **STORAGEREADY'S MEASURED IMPACT:**

Operational Area	Measured Improvement
Alert Management	90% reduction in daily volume
Incident Resolution	50% faster resolution times
Downtime Prevention	Eliminated capacity-related outages
Compliance Efficiency	Simplified audit preparation
Staff Productivity	Shift from firefighting to strategy
- **FLEXIBLE DEPLOYMENT OPTIONS:**
 - **Proof of Value:** ReadyWorks Accelerator 30-day pilot connecting your storage environment.
 - **Guided Implementation:** Full deployment with expert support.
 - **Strategic Consultation:** Tailored design for enterprise-scale observability.
- **ENTERPRISE SECURITY & COMPLIANCE:**
 - Maintain data control with on-premises deployment while gaining the benefits of centralized visibility and automation.

Next Steps:

Storage should never be a guessing game. Book your technical walkthrough today and discover how ReadyWorks can deliver clarity, control, and confidence.

One platform. All your storage.
No more surprises.
