

# ENDPOINT READY

YOUR ORCHESTRATED ENDPOINT MANAGEMENT SOLUTION

REDUCE COSTS, IMPROVE SECURITY, ENHANCE USER EXPERIENCE

## THE PROBLEM

- **High CAPEX from Short Asset Lifecycles:** Unnecessary hardware replacements from poor endpoint visibility and inefficient refresh programs drive up capital costs.
- **OPEX Bloat via Manual Processes:** Labor-intensive coordination for migrations, updates, and deployments increases downtime and inflates operating expenses.
- **Security & Compliance Risks:** Limited visibility into endpoints delays patching, leaves unsupported systems in place, and increases exposure to breaches and regulatory fines.
- **Poor User Experience:** Outdated devices, disruptions from manual migrations, and frequent support tickets frustrate employees and reduce productivity.
- **Sustainability Challenges:** Inefficient reallocation shortens device lifespans, generating e-waste and conflicting with ESG and sustainability goals.

## THE SOLUTION

EndpointReady orchestrates endpoint management by:

- **Centralizing Visibility:** Aggregate and normalize data across CMDBs, ITSM, HR, and deployment tools.
- **Automating Workflows:** Streamline refreshes, Windows 11 upgrades, license management, and patching.
- **Enhancing Communications:** Deliver audience-specific messaging via configurable templates and self-service portals.
- **Driving Compliance:** Detect non-compliant systems and automatically launch remediation workflows.
- **Empowering Decision-Makers:** Provide executives and EUC teams with real-time dashboards for smarter investments.

## KEY BENEFITS

- **CapEx Savings:** Extend endpoint lifecycles with smart allocation, reducing unnecessary replacements.
- **OpEx Reductions:** Eliminate manual coordination, cut migration costs by up to 40%, and reduce downtime.
- **Security Enhancements:** Ensure timely patches, eliminate unsupported OS, and reduce breach risk.
- **Sustainability Gains:** Promote device reuse and reduce e-waste in alignment with ESG goals.
- **Improved User Experience:** Deliver faster upgrades, fewer disruptions, and better employee productivity.
- **Strategic Visibility:** Enable data-driven technology decisions with dynamic dashboards.
