# readyworks

Reduce the Risk & Cost of IT Infrastructure Transformation

One platform conducts data, systems, and people.

ReadyWorks is a Digital Platform Conductor. It allows you to deliver IT programs faster while mitigating risk and eliminating millions of dollars in operational inefficiencies. ReadyWorks can be used for any IT program including asset management, OS updates, cloud migrations, O365 migration, and more.

ReadyWorks integrates and normalizes critical program data, analyzes risk, automates and orchestrates workflows, and provides real-time status in a single command and control platform. It can turn any IT project into a repeatable process that makes your team's work easier while allowing you to confidently speed up adoption of the latest technologies.

With ReadyWorks, you'll be able to:

- Reduce IT program costs by 50% or more

- Automate 50% or more of manual tasks.

- Shorten project timelines by at least 30%.

Complete IT programs faster with less risk.

Use ReadyWorks to Orchestrate Complex IT Infrastructure Programs:

Integrate Data: Collect, clean, and normalize critical program data.

Analyze and Plan: Accurately scope projects, mitigate risk with better data.

**Conduct:** Automate and orchestrate human and system tasks

Visualize: Assess status and risk

Access the information you need to make fast, accurate, impactful decisions

ReadyWorks automates data collection, aggregation, and analysis to provide you with clean data that will save you months of effort during the discovery phases of your programs.

- Automate data collection from multiple systems with API-based integrations.
- Import from spreadsheets, text files and other manually compiled sources.
- Automatically update data in real-time.
- Identify missing information or data mismatches.
- Rationalize large volumes of information into manageable data sets.
- Use data analytics to drive program decisions, planning and execution.
- Maintain audit trails.

Build and execute more accurate plans

Improve program quality, reduce business disruption, and drive better end-user experiences with ReadyWorks.

- Get started quickly with best-practice project templates.
- Analyze information about users, systems, and their dependencies.
- Segment users and systems into migration waves based on readiness, business unit, geography, and other properties.
- Visually track and preview migration waves and tasks with color-coded, interactive Gantt charts and schedules generated from real-time information.
- Assign, manage, and update tasks automatically.
- Use custom dashboards to keep your entire team up to date.
- Automatically populate build sheets and task templates.
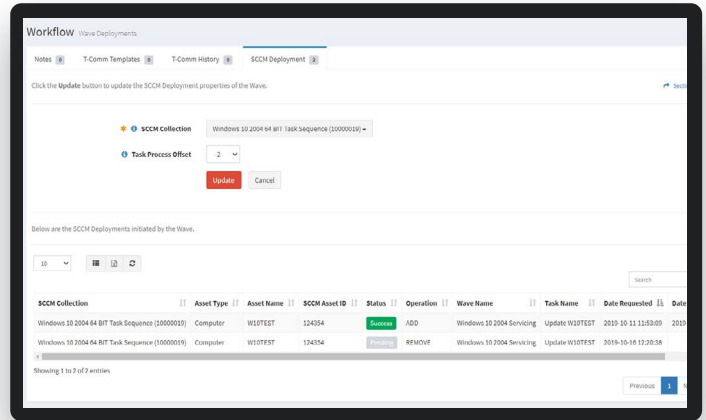

Orchestrate and automate workflows for faster, more effective programs

Nearly 50% of manual tasks in an IT program can be automated. Use ReadyWorks to streamline processes and accelerate program completion.

- Use event triggers or program status to launch IT system workflows.
- Create team member tasks based on event triggers or program status.
- Automate end user self-scheduling with the self-service portal.
- Use date and event triggers to automate communications to end users, team members, and managers.
- Leverage a robust REST API to access, create, and update ReadyWorks assets using a variety of other web services and software.

Analyze results with real-time insights to program status

Automate reporting, increase transparency, and drive continual process improvement.

- Combine live data from multiple sources to gain immediate insight into the health of your IT programs.
- View detailed information about systems, users, and the businesses they support with multi-level dashboards.
- Customize dashboards and reports for easy access by any stakeholder, from CIO to CISO, to engineer.
- Integrate with your environment to create a central monitoring point for all systems involved in your program.

Fortune 100 Financial Services Firm Improves Windows Lifecycle Management

This firm was accustomed to replacing 1/3 of their 60,000 endpoints each year, but with the introduction of Windows 10 they found themselves overwhelmed and unable to keep up with the demands of application testing, hardware replacement, and upgrade scheduling. They were out of compliance, behind on security updates, and delivering a poor end user experience. With ReadyWorks they were able to drastically improve the quality of their Windows Servicing process while simultaneously saving thousands of resource hours.

Outcomes

- $1.3M labor cost savings.
- 13,316 total labor hours saved during Windows Servicing.
- 2,000 machines upgraded per day with 1 technician.

Financial Marketplace Operator Simplifies IT Infrastructure Modernization

With an average daily transaction volume of $725 billion, this 1,200-person company cannot afford downtime or disruptions to its complex IT infrastructure. Thanks to ReadyWorks, it now has a single master IT system of record through which it can manage day-to-day IT needs, modernization programs, compliance and security updates, and infrastructure upgrades.

Outcomes

- Single, definitive IT infrastructure system of record.
- Maximum uptime of critical systems.
- Data aggregation for business planning and budgeting.
- Endpoint compliance with audit trail.
- Increased operational efficiency.

Reduce the cost and risk of your IT programs.

About ReadyWorks

The ReadyWorks platform was created by a team of engineers and project managers that have been delivering migrations and transformations to enterprises for the last 20 years. Knowing the challenges, pitfalls and risks that repeatedly cause delays and increase costs, we created a better path forward.
